

侧式悬臂堆料机/桥式刮板取料机

Side Cantilever Stacker & Bridge Scraper Reclaimer

产品用途及特点:

该类堆取料机多用于堆取石灰石、原煤等散状物料。实现了整机无人操作及机、电、液一体化。具有均化效果好、料场储量大、占地面积小、自动化程度高等特点，是目前国内最先进的大型混匀工艺设备，达到国际同类产品的先进水平。

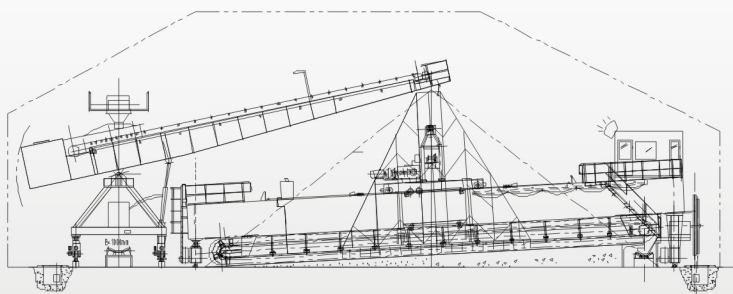

Applications & Features of Product:

This equipment which is usually used in stacking and reclaiming limestone, coal and other assistant bulk material. It can work across piles, It is realized the unmanned operation and the mechanical-electrical-liquid integration. Now it is the most advanced large-scale homogenizing equipment in China which has the characteristic of large storage, small floor space, high degree automation. To reach the international advanced level of similar products.
